Professional working

Roger KOUFIONOU

Lead Software & Data Engineer · Java · Spring Boot · Angular

- 8+ years
- Banking
- Insurance
- Government
- Data & AI

01 PROFILE

Senior engineer with **8+ years** designing, building and integrating **software and data solutions**. Specialized in **Java, Spring Boot, microservices, cloud and service-oriented architectures**, I have led complex projects in the **banking, insurance, government and industrial** sectors — from business-rules engines for one of Europe's largest insurers, to compliance data platforms for a corporate & investment bank, to a state-level budget management system for a national Ministry of Finance.

02 KEY ACHIEVEMENTS

- 01 Designed a **data platform architecture** for an investment bank
- 02 Deployed **BRMS solutions** for a major insurer
- 03 Delivered **enterprise application integration** (SOA, API Gateway, Kafka)
- 04 Led a **state-level budget management system**
- 05 Shipped **multi-environment CI/CD pipelines**, optimizing releases
- 06 Built and integrated **BI & reporting solutions**

03 EXPERIENCE

Accenture

Mauritius · Dec 2021 → Present

Lead Software & Data Engineer

Jun 2025 → Present

Mission · Crédit Agricole, Corporate & Investment Bank

- Corporate & Investment Bank data engineering
- Compliance Data Hub & platform architecture
- Financial security & market integrity
- Business APIs & intelligence

BRMS — Java Software Engineer

Aug 2023 → May 2025

Mission · AXA France, Insurance & Banking

- Business Rules Management Systems (BRMS)
- Business Decision API: analysis, design & development
- Service-Oriented Architecture design · microservices · CI/CD on Azure DevOps

EAI — Java Software Engineer

Dec 2021 → Jul 2023

Mission · AXA France, Insurance & Banking

- Enterprise Application Integration platform: analysis & development
- API design & integration: SOA, microservices, API Gateway, webMethods, Kafka, Kafka Connect
- REST/SOAP API development & maintenance (Java 8 & 17, Spring Boot)
- Build & deployment management: CI/CD, Sonar, Azure DevOps, CaaS/PaaS

// CERTIFICATIONS

- ▶ Oracle Certified Professional
Java SE 25 Developer
- ▶ Oracle Database 12c
SQL Fundamentals (1Z0-061)
- ▶ Technology Architect Associate
- ▶ Certified Cybersecurity
Technician (CCT)
- ▶ Agile Scrum Master

// EDUCATION

- ▶ PG Diploma, Information
Technology
Amity University · 2015 – 2016
- ▶ Bachelor's, Software Engineering
Université de Lomé · 2009 – 2013

// PASSIONS

- ▶ Software architecture
- ▶ Data engineering
- ▶ Digital transformation
- ▶ Open source & knowledge sharing

// MOTTO

"Clean code, solid pipelines,
happy teams."

03 EXPERIENCE (continued)

Next Generation Services

Lomé, Togo · Jan 2017 → Apr 2021

Lead Software Engineer

Jan 2018 → Apr 2021

Client · Ministry of Economy and Finance of Togo

- Technical project manager for the state budget management system
- Functional & technical analysis and implementation of software applications
- Design and integration of financial and document management systems
- BI dashboards development and training of local teams · Agile project management

Java Software Developer

Jan 2017 → Dec 2017

Java · Spring Boot · AngularJS / Angular · PostgreSQL · Oracle · Git ·
Jenkins · Sonar · Tomcat

2021 **HITECH Geoservices** · IT Consultant, Java — web & backend apps
(Java, Spring Boot, Angular), CI/CD, agile delivery

2021 **Id2Real** · IT Consultant, Java — web & backend apps, team
coordination, CI/CD

2015 – 2016 **NTCI** · Java Developer — commercial management software, DB
administration

2014 – 2015 **Senior Secondary School** · Mathematics Teacher

2013 – 2014 **Port Autonome de Lomé** · Web Developer — vehicle fleet management
app

04 OPEN SOURCE

🔗 Business Rule Framework

github.com/rogerstinho/business-rule-framework

A lightweight Java framework to write, run and document business rules, built on years of BRMS work in insurance.

- Modular rules, conditions & actions
- Decision tables written as Markdown
- Annotations that auto-generate business docs
- Samples: COCOMO → tax → full payroll engine

Java 21

Maven

BRMS

© Observability with OpenTelemetry

github.com/rogerstinho/observability-opentelemetry

A hands-on observability platform for Spring Boot microservices: traces, metrics and logs in one place.

- 3 instrumented microservices
- OpenTelemetry Collector pipeline
- Grafana · Tempo · Loki · Prometheus
- Jaeger & Zipkin via Docker Compose
